CARATTERISTICHE TECNICHE - CARACTERISTIQUE TECHNIQUES TECHNICAL SPECIFICATIONS - TECHNISCHE SPEZIFIKATIONEN

1. Impiego di materiali ad alta resistenza ed elasticità e conseguente miglioramento delle proprietà meccaniche del montante rispetto la precedente versione (vedi grafico).
 2. Grande facilità di apertura grazie ad un ampio spazio per l'introduzione della mano che ne consente un'efficace

impugnatura.
 3. Intercambiabilità dimensionale con la precedente versione.
 4. Trattamento anticorrosione di cataforesi, su richiesta.
 5. Produzione robotizzata.

1. Utilisation du matériel à haute résistance élastique respectant les caractéristiques mécaniques propres au rancher (voir la graphique).
 2. Grande facilité d'ouverture grace a l'amplitude d'ouverture offrant une bonne prise en main.

3. Interchangeable dimensionnellement à la précédent version.
 4. Traitement anti-corrosion , cataphorèse sur demande.
 5. Production robotisée.

1. Built with extremely resistant and flexible material improving the Pillar mechanical properties when compared to the previous version (pls. see the diagram).
 2. Easy to be operated, thanks both to the wide Lever seat allowing a safe grip.

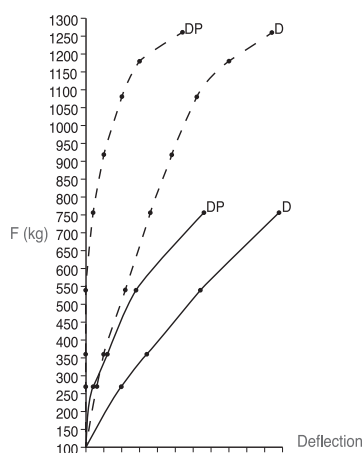

3. Trailer Lock Pillar and previous version have compatible dimension.
 4. On request, "KTL" antirust treatment available.
 5. Advanced production processes.

1. Die mechanischen Teile der Runge sind aus sehr widerstandsfähigem Material mit guten Gleiteigenschaften hergestellt.
 2. Leichtere Handhabung dank breiterem Hebelsitz.

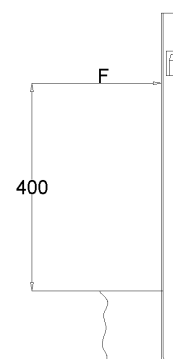

3. Die neuen "Trailer Lock" -Rungen sind kompatibel mit allen Vorgängermodellen.
 4. Auf Wunsch ist die Runge auch mit einer Oberflächenbehandlung "KTL" gegen Rost erh ältlich.
 5. Vollautomatisiert Produktion.

Montanti Ranchers Single lever pillars Rungen

SERIE SPECIALE
SPECIAL SERIE

Emissione 01/009

Versione

Acciaio tranciato S235 e parti in presso fusione.

Impiego

Allestimenti fissi ,rimorchi,semirimorchi, motrici.

Vantaggi

Versione semplificata di un montante ITAL TOP.

La leva ha il solo scopo di sganciare il montante dalla base e dalle prolunghe TOP. Le sponde si impegnano al montante per mezzo di chiusure fissate sulle stesse.

Version

Acier tranché S235 et composant en pression.

Emploi

Bennes fixe, remorques, semi-remorques, motrice.

Avantages

version simplifier d'un ranchers ITAL TOP.

la lève sert seulement à décrocher le ranchers de la base et de la rallonge TOP.

les ridelles s'accrochent au ranchers grace à des fermeture fixées sur ces dernières.

Version

components in S235 steel end pressure casting.

Application

Fix body trailers and semi-trailers.

Advantages

Simplified version of the traditional ITAL TOP Pillar.

The single lever's purpose is to engage the pillar to the socket and top, only.

The side panels would be engaged to the pillar via 2 aluminium locks.

Ausführung

Stahlzuschnitt S235 und Preßgußteil

Verwendung

Bei Zufahrzeugen, Anhänger und Sattelanhänger

Vorteile

Erleichtere Ausführung eines Ital-top Runge.

Der Hebel gestattet die Runge von der Basis und Top abzuhängen. Die Bordwände sind an der Runge durch einen Verschluss befestigt.

VERSIONE ALLUMINIO
ALU VERSION

Emissione 01/009

Versione

Alluminio e acciaio cataforizzato.

Impiego

Allestimenti di motrici rimorchi e semirimorchi modello curtain sider.

Vantaggi

Riduzione di peso, eliminazione della corrosione, qualità estetica superiore.

Version

Aluminium et acier, avec cataphorèse.

Emploi

Tracteurs pour remorques et semi-remorques modèle curtain sider.

Avantages

Reduction du poids, grande protection contre la rouille, amelioration de l'esthétique.

Version

Aluminium and pre-coated steel.

Application

Curtain-siders.

Advantages

Weight reduction, no corrosion, appealing design.

Ausführung

Aluminium und Stahl mit KTL-Beschichtung.

Verwendung:

Bei Zugfahrzeugen, Anhänger und Sattelanhänger Typ "Curtain Sider".

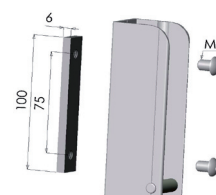

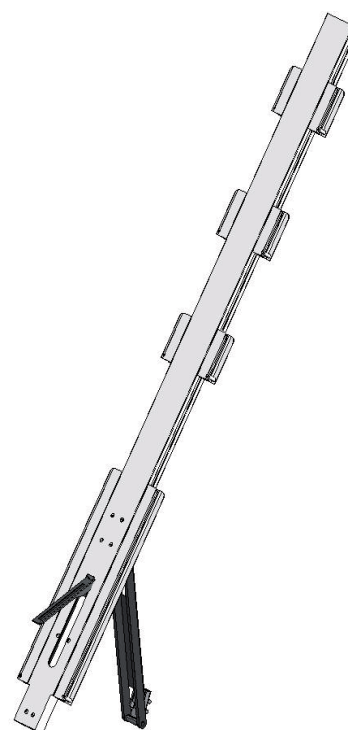

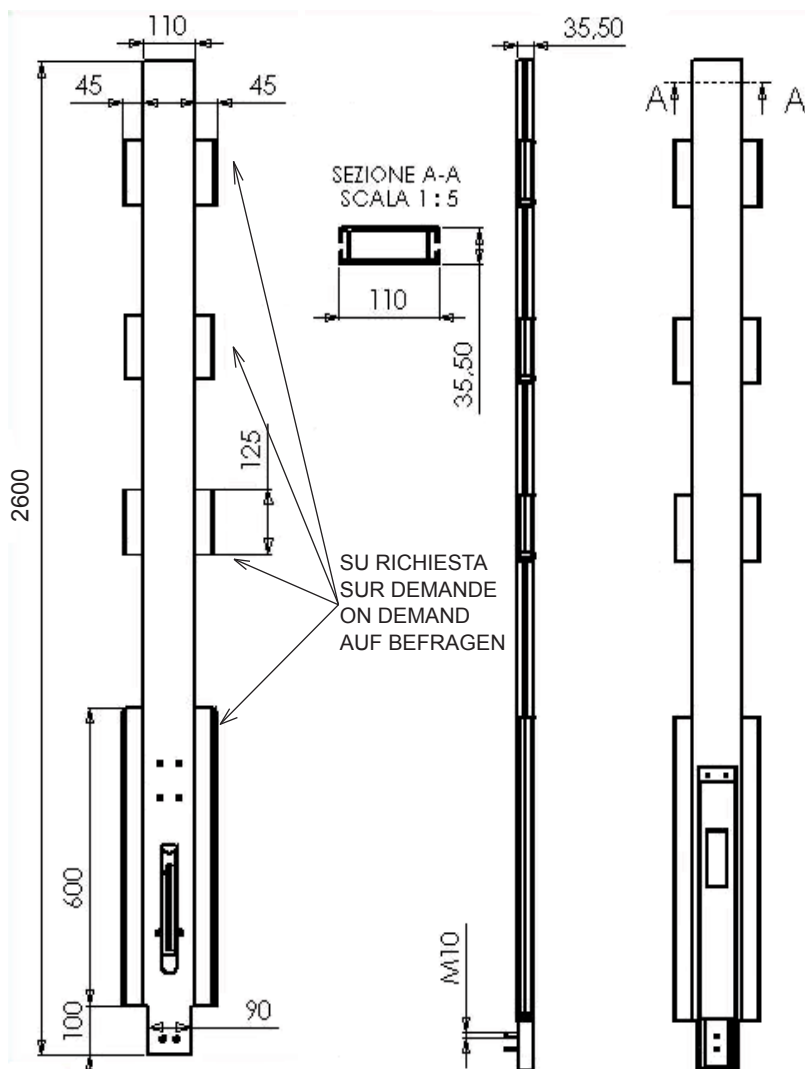

Vorteile:

Gewichtsreduzierung, Korrosionsbeständig, optische Optimierung.

Mont. scorrevole L=2600

Cod.	135056.00
Materiale	Alluminio e acciaio
Peso	Kg 12,6

SERIE LEGGERA
LIGHT SERIES

Emissione 01/009

Versione

Leggeri e resistenti.

Impiego

Ideali per allestimenti da 3,5 tonnellate di portata totale.

Vantaggi

Semplicità di montaggio.
 Produzione automatizzata.

Version

Légers et résistants.

Emploi

Idéaux pour équipement de 3,5 tonnes de portée totale.

Avantages

Simplicité d'assemblage.
 Production automatisée.

Version

Light and strong.

Application

Made to suit 3,5 Tons vehicle.

Advantages

Easy fitting.
 Advanced production.

Ausführung

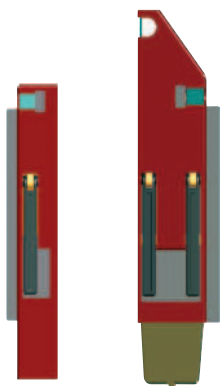

Leicht und widerstandsfähig.

Anwendung

Ideal für die Einrichtung von 3,5 Tonne der gesamter Tragfähigkeit.

Vorteile

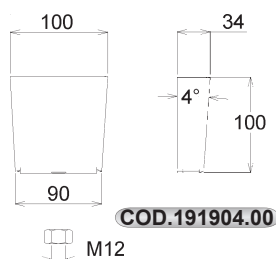

Einfachheit des Zusammenbau.
 Automatisierte Produktion.

CARATTERISTICHE TECNICHE - CARACTERISTIQUES TECHNIQUES
TECHNICAL SPECIFICATIONS - TECHNISCHE SPEZIFIKATIONEN

1. Impiego di materiali ad alta resistenza ed elasticità e conseguente miglioramento delle proprietà meccaniche del montante rispetto la precedente versione (vedi grafico).
2. Grande facilità di apertura grazie ad un ampio spazio per l'introduzione della mano ed all'arresto della maniglia a 15° che ne consente un'efficace impugnatura.
3. Sede di alloggiamento del perno-sponda, realizzata con monoblocco in fusione. Da ciò ne consegue una più elevata resistenza e l'eliminazione del rischio di apertura accidentale della sponda, asseguito di forti sollecitazioni del carico (riscontrabile frequentemente nella sponda posteriore).
4. Innovativo sistema di eliminazione delle vibrazioni presenti tra la sede

- montante ed il perno-sponda, denominato "spring lock". Tale dispositivo elimina i rischi di incrinature nella scatola esterna del montante garantendo una elevata elasticità di esercizio.
5. Il sistema "spring lock" consente una sensibile riduzione della rumorosità in marcia (nel rispetto delle normative emesse per la riduzione dell'inquinamento acustico).
 6. Intercambiabilità dimensionale con la precedente versione.
 7. Montante disponibile anche in acciaio inox totale sia nella versione rovesciabile che innesto.
 8. Trattamento anticorrosione di cataforesi, su richiesta.
 9. Produzione robotizzata.

1. Utilisation du matériel à haute résistance élastique respectant les caractéristiques mécaniques propres au rancher (voir le graphique).
2. Grande facilité d'ouverture grâce à l'amplitude d'ouverture du levier et de son arrêt à 15°, position ouverte offrant une bonne prise en main.
3. Logement de l'axe de ridelle réalisé dans un bloc de fusion qui offre une haute résistance et évite une ouverture accidentelle de la ridelle sous pression d'une forte charge (surtout sur la ridelle arrière).
4. Ce système innovant élimine les vibrations des montants, axes, ridelles

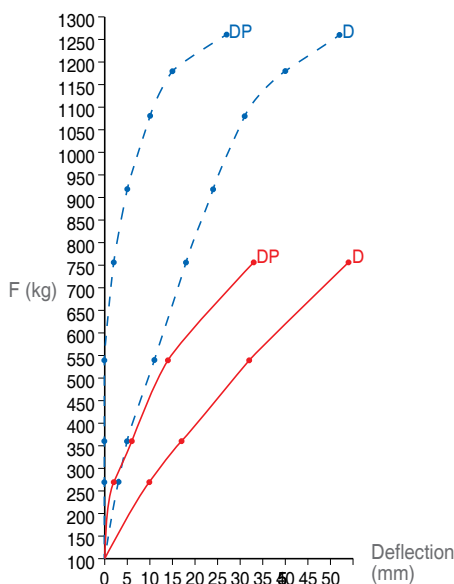

- (élimination de ruptures accidentelles).
5. Ce système innovant dit "SPRING LOCK" offre également une diminution du bruit en marche et respecte la normative relative au bruit de l'environnement.
 6. Interchangeable dimensionnellement à la précédente version.
 7. Rancher disponible également en acier inox.
 8. Traitement anti-corrosion, cataphorèse sur demande.
 9. Production robotisée.

1. Built with extremely resistant and flexible material improving the Pillar mechanical properties when compared to the previous versions (pls. see the diagram).
2. Easy to be operated, thanks both to the wide Lever seat and to the Lever opening position at 15°, allowing a safe grip.
3. The Seat of the side-board pin is now composed by a single element in casting. This solution ensures a stronger and safer locking of the side and rear boards against the heavy load stress.
4. "Spring Lock" System which names this new range of Pillars. It is an innovative device against vibrations between side-board pin and pillar,

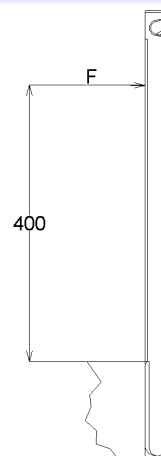

- designed to prevent damages to the pillar body caused by the common chattering of the above elements during road and off-road journeys. Furthermore, it ensures a high flexibility to any load stress.
5. "Spring Lock" system means also a sensible noise reduction (in compliance with the existing regulations concerning noise pollution).
 6. Spring Lock Pillar and previous versions have compatible dimensions.
 7. The inox version is now full body.
 8. On request, "KTL" antirust treatment available.
 9. Advanced production processes.

1. Die mechanischen Teile der Runge sind aus sehr widerstandsfähigem Material mit guten Gleiteigenschaften hergestellt.
2. Leichtere Handhabung dank breiterem Hebelsitz. Die Offenposition von 15° des Hebels erleichtert die Handhabung.
3. Das Gegenlager des Seitenladenbolzens ist neu ein gegossenes Teil, diese konstruktive Lösung garantiert einen robusten und sicheren Verschluss der Seiten- und Hinterläden.
4. Das neue Rungenprogramm ist nach dem neuen Verschlussystem "Spring Lock" benannt. Dieses Verschlussystem ist eine innovative Lösung gegen auftretende Vibrationen welche zwischen Seitenladenbolzen und Rungen entstehen, konzipiert zur Verhinderungen von Beschädigungen an der Runge, hervorgerufen durch das Aneinanderschlagen der Runge und

- des Seitenladens während der Fahrt auf der Strasse und im Gelände. Zudem gewährleistet das neue Verschlussystem eine optimale Flexibilität gegen die Ladungskräfte auf die Seitenläden.
5. Dank dem neuen System "Spring Lock" konnte das "Scheppern" erheblich eliminiert werden.
 6. Die neuen "Spring Lock"-Rungen sind kompatibel mit allen Vorgängermodellen.
 7. INOX-Ausführung ist als "full body" erhältlich.
 8. Auf Wunsch ist die Runge auch mit einer Oberflächenbehandlung "KTL" gegen Rost erhältlich
 9. Vollautomatisiert Produktion

Embout de ridelle zinguée pour benne
Galvanized sideboard heads for tipper
Verzinkt Einfaßprofil für Pendel

Emissione 01/009

Versione

Lamiera decapata Fe P11.

Impiego

Sponde in alluminio arrotondate s.30mm.

Vantaggi

Perfetto accoppiamento con il profilo in alluminio.
 Rapidità di montaggio.
 Resistenti agli urti.

Version

Tôle decapée Fe P11.

Emploi

Ridelles en Aluminium arrondies ép. 30mm.

Avantages

Couplage parfait avec le profile en alu.
 Rapidité de montage.
 Resistance aux chocs.

Version

Fe P11 steel press.

Applications

Sidepanel heads for 30mm aluminium profiles.

Properties

Good design and high shocks resistance.

Ausführung

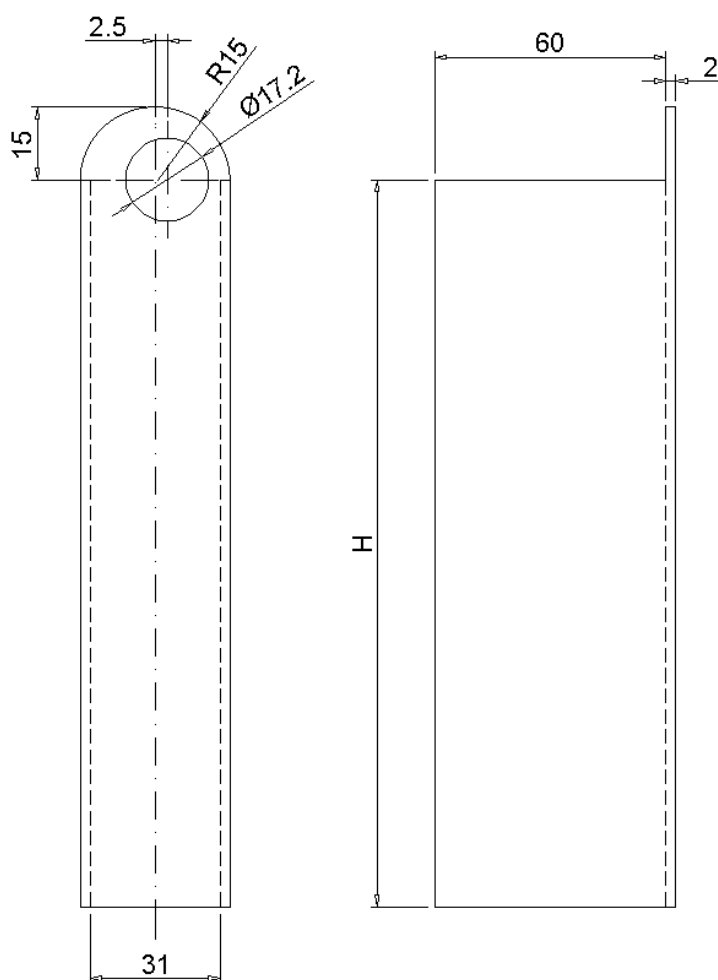

Abgebeiztes Blech Fe P11.

Anwendung

Gerundete Aluminium-Bordwand-profile 30mm.

Vorteile

Vollkommene Kupplung mit dem Alu-profil.
 Schnellere Montage Stoßfest.
